

Undaunted

Tackling climate change with innovation

A partnership between

IMPERIAL
Grantham Institute

Ri The Royal Institution
Science Lives Here

An ecosystem that empowers climate innovators, from idea to impact

Undaunted powers early-stage climate innovation across London, the UK & beyond.

Building a pipeline

Creating new routes into climate innovation

MSc Cleantech Innovation

Become a climate innovator: interdisciplinary postgraduate study focused on developing game-changing cleantech, design & entrepreneurial skills.

Climate Solutions Catalyst

Accelerating the journey from academic discovery to climate innovation using alma, our AI-powered platform that identifies overlooked climate research with high-impact potential.

Climate Entrepreneurs Club

Pre-accelerator connecting & inspiring students across Imperial, London & beyond, who are motivated to take their skills & ideas into cleantech.

Incubating innovators

Nurturing next-generation green entrepreneurs

The Greenhouse

Our flagship 12-month accelerator supports the UK's most ambitious early-stage, 'pre-seed' climate startups & spinouts to validate their business models, land pilots & raise investment. It offers up to £20k equity-free grant funding & access to Imperial's world-class facilities, expertise & networks.

Supporting growth

Enabling innovators in the challenging early stages of scaling & commercialisation

EarthScale

A UK-wide 12-month programme supporting IP-rich climate tech ventures to scale, navigate manufacturing & raise Series A funding.

Corporate partnerships

Working with leading corporates to apply R&D to create sustainable growth. Focusing clean tech pioneers on their problems & scaling solutions to deliver at pace.

Sector wide support

Connecting industry, academia & emerging innovation to solve shared challenges in complex sectors like the built environment. Driving collective progress & sustainable growth across sectors through collaborative partnerships, real-world testing & open knowledge exchange.

Nurturing the ecosystem

Our ecosystem draws together a strategic network of climate innovation supporters

Undaunted alumni network

Supporting a thriving community of 165+ climate startups, who have progressed through our programmes with tailored investor & corporate connections, media visibility, mentoring, policy engagement & curated opportunities to scale their impact.

UK network

EarthScale is growing a national powerhouse network of university-led regional hubs, building a connected, long-term ecosystem to scale the UK's most promising climate tech ventures.

Global network

Harnessing the power of accelerators, incubators & other entrepreneur support organisations globally, turning a scattered landscape into a strategic force for systemic change.

Our impact

Since 2012 Undaunted alumni have raised more than **\$1.3 billion investment**; created over **1,600 jobs in 30 countries**; and have a **survival rate of 88%**, compared to the industry average of 10%.

By 2030, Undaunted alumni are forecast to save: **29 million tonnes** of cumulative CO₂ e; **76 million tonnes** cumulative waste; **7.4 million litres** total fresh water.

We envision a world where diverse innovators, leading businesses of all sizes, are delivering significant emissions reductions and climate resilience sustainably, at scale, and at pace.
