

Undaunted

Tackling climate change with innovation

A partnership between

IMPERIAL
Grantham Institute

Ri The Royal Institution
Science Lives Here

An ecosystem that empowers climate innovators, from idea to impact

Undaunted powers early-stage climate innovation across London, the UK and beyond.

Building a pipeline

Creating new routes into climate innovation

MSc Cleantech Innovation

Postgraduate study for aspiring climate entrepreneurs who are passionate about developing game-changing cleantech.

Climate Solutions Catalyst

Untapping the potential of academic research to accelerate climate innovation, through bespoke searches to identify solutions, and translational support for individuals and teams.

Climate Launchpad

The world's largest green business ideas competition.

Incubating innovators

Nurturing next-generation green entrepreneurs

The Greenhouse

Our flagship 12-month accelerator supports the UK's most ambitious early-stage, 'pre-seed' climate startups to validate their business models, land pilots, and raise investment. It offers up to £20k equity-free grant funding and access to Imperial's world-class facilities, expertise and networks.

Supporting growth

Enabling innovators in the challenging early stages of scaling and commercialisation

EarthScale

A UK-wide, 12-month programme supporting IP-rich climate tech startups and spinouts to scale, navigate manufacturing and raise Series A funding.

Corporate partnerships

Working with leading corporates to apply R&D to create sustainable growth. Focusing clean tech pioneers on their problems and scaling solutions to deliver at pace.

Sector wide support

Connecting industry, academia and emerging innovation to solve shared challenges in complex sectors like the built environment. Driving collective progress and sustainable growth across sectors through collaborative partnerships, real-world testing and open knowledge exchange.

Nurturing the ecosystem

Our ecosystem draws together a strategic network of climate innovation supporters

Undaunted alumni network

Supporting a thriving community of 165+ climate startups, who have progressed through our programmes with tailored investor and corporate connections, media visibility, mentoring, policy engagement, and curated opportunities to scale their impact.

UK network

EarthScale is growing a national network of university-led regional hubs, building a connected, long-term ecosystem to scale the UK's most promising climate tech ventures.

Global network

Harnessing the power of accelerators, incubators and other entrepreneur support organisations globally, turning a scattered landscape into a strategic force for systemic change. Powered by Undaunted and The Earthshot Prize.

Our impact

Since 2012 Undaunted alumni have raised more than **\$1.3 billion investment**; created over **1,600 jobs in 30 countries**; and have a **survival rate of 88%**, compared to the industry average of 10%.

By 2030, Undaunted alumni are forecast to save: **29 million tonnes** of cumulative CO₂ e; **76 million tonnes** cumulative waste; **7.4 million litres** total fresh water.

We envision a world where diverse innovators, leading businesses of all sizes, are delivering significant emissions reductions and climate resilience sustainably, at scale, and at pace.
